

# SAMPLE PRINTING INSTRUCTION (QR CARDS)

Take the following steps to print your Quick Reference Card on both sides of 1 sheet of paper:

1. Open the Quick Reference Card PDF file you wish to print.
2. From the File menu, select **Print**.  
The Print window appears.

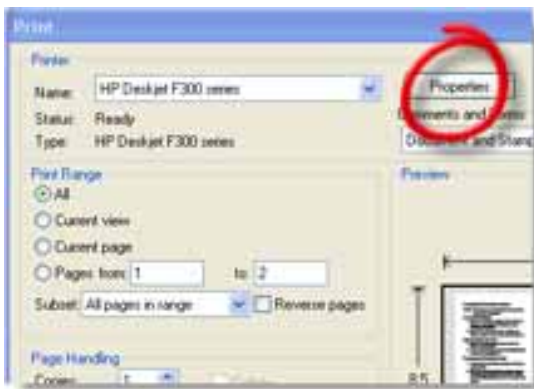

## SELECTING YOUR PRINTER

Select your destination printer from the list.

## SELECTING YOUR PAGE SIZE AND 2-SIDED PRINTING

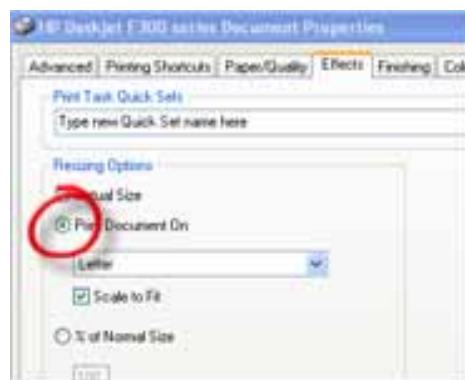

1. From the Print window, click **Properties**.  
The Document Properties window appears.

2. Click the **Effects** tab.  
The Effects Tab window appears.

3. Click **Print Document On**, and then select the desired paper size from the list.

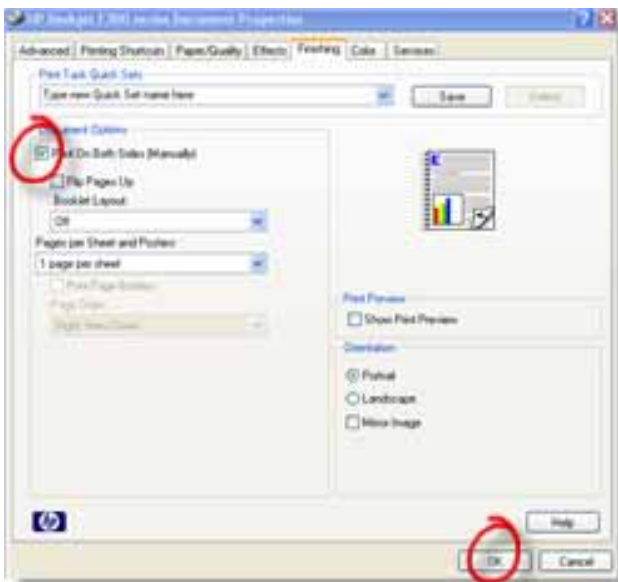

4. Click the **Finishing** tab.

The Finishing Tab window appears.

5. Check the **Print On Both Sides** check box, and then click **OK**.

The Document Properties window disappears, and then the Print window appears.

6. In the Print window, click **OK**.

Your page prints on the first side.

7. Remove the printed page and feed it back into your printer so that it prints on the opposite side at the correct orientation.

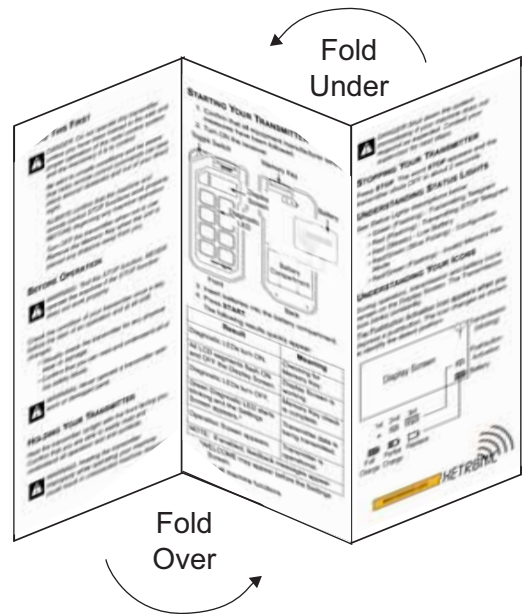

**NOTE:** Double-side printing procedures vary per printer. See your printer documentation for details if needed.

### FOLDING YOUR QUICK REFERENCE CARD

When folded, your Quick Reference Card fits neatly into a pocket.

Take the following steps to fold your Quick Reference Card:

1. Confirm that the page is printed on both sides, and that the text is right-side up on both sides.
2. With the transmitter image facing down, fold the left third of the sheet so that the transmitter image appears on top.

3. Fold the right third of the page under so that the Hetronic logo appears on the back panel.
4. Your Quick Reference Card is ready to use or laminate.

**NOTE:** Lamination machines vary. If needed, see your lamination machine documentation for lamination instructions.
